## Objective

I am a fullstack web developer and mechanical engineer, in fact, got my master's in mech. About a year ago (2021) I started coding occasionally. Suddenly the hobby became a habit that I couldn't shake. So decided to change my career to Web development. Now a year later, I'd stand at the point where I'm capable of developing the website's UI with React and Next framework, and building backend and APIs (REST & graphql) using node and expressjs.
